

I think this is nothing more than a long awaited opportunity to eliminate VCRs and other personal recording equipment. Eventually all broadcasts will be sent via an HDTV signal, where will our "fair use" rights be then?

How will I be able to view programming I was not present to see? Will I be forced into a "pay per view" scheme just to watch "non premium" programming? If #02-230 passes I guarantee you the "pay per view" senario will become the norm & and my ability to consume non premium content will be severely impacted.

Thank you for your time.
